17. How can CAC process be made more effective?	Follow up on promises made at meetings. Personal visit to neighbors to get feedback from neighbors who aren't active. Good process. Help w/newsletter which goes out to all residents. Contact all neighbors and encourage them to participate in meetings. Compare current status to baseline study each year	
18. Any other thoughts or suggestions?	Keep up good work trying to improve the environment. Provide alternative to coffee at meetings. Looking forward to plant tour this fall. CCP got everything they wanted; did the community? From the first meeting til now this was all cut and dry!
